

Product Advisory

PA-1011-03

DATE: 5/6/03

REVISED:

MODELS: Aerials

SUBJECT: Tool Coupler Covers

ISSUE:

Terex Telelect has become aware of situations where operators have brought hydraulic tool hose end fittings into contact with conductors or associated components. This contact has caused arc damage to the tool hose end resulting in fire and serious injury to workers, who were in violation of OSHA regulations by not maintaining clearance or not covering conductors. The Occupational Safety and Health Administration (OSHA) regulations specify that users of aerial devices are to maintain clearance from energized conductors or cover them to prevent contact.

ACTION:

Terex Telelect is making available a new series of tool fitting covers which are intended to help prevent accidental contact with the tool hose end fittings. Some of these are intended to be used in addition to existing covers, others will replace existing covers, and in some cases the tool fittings will be relocated.

Installation of these covers does not reduce the responsibility of the operator to maintain clearance or cover lines as required by OSHA (1926.950) and National Electric Safety Code (ANSI C-2 Part 4).

We urge you to obtain and install these covers as soon as possible. Since we encourage our customers to install these covers, we are offering them at a reduced cost. The installation costs are the responsibility of the owner.

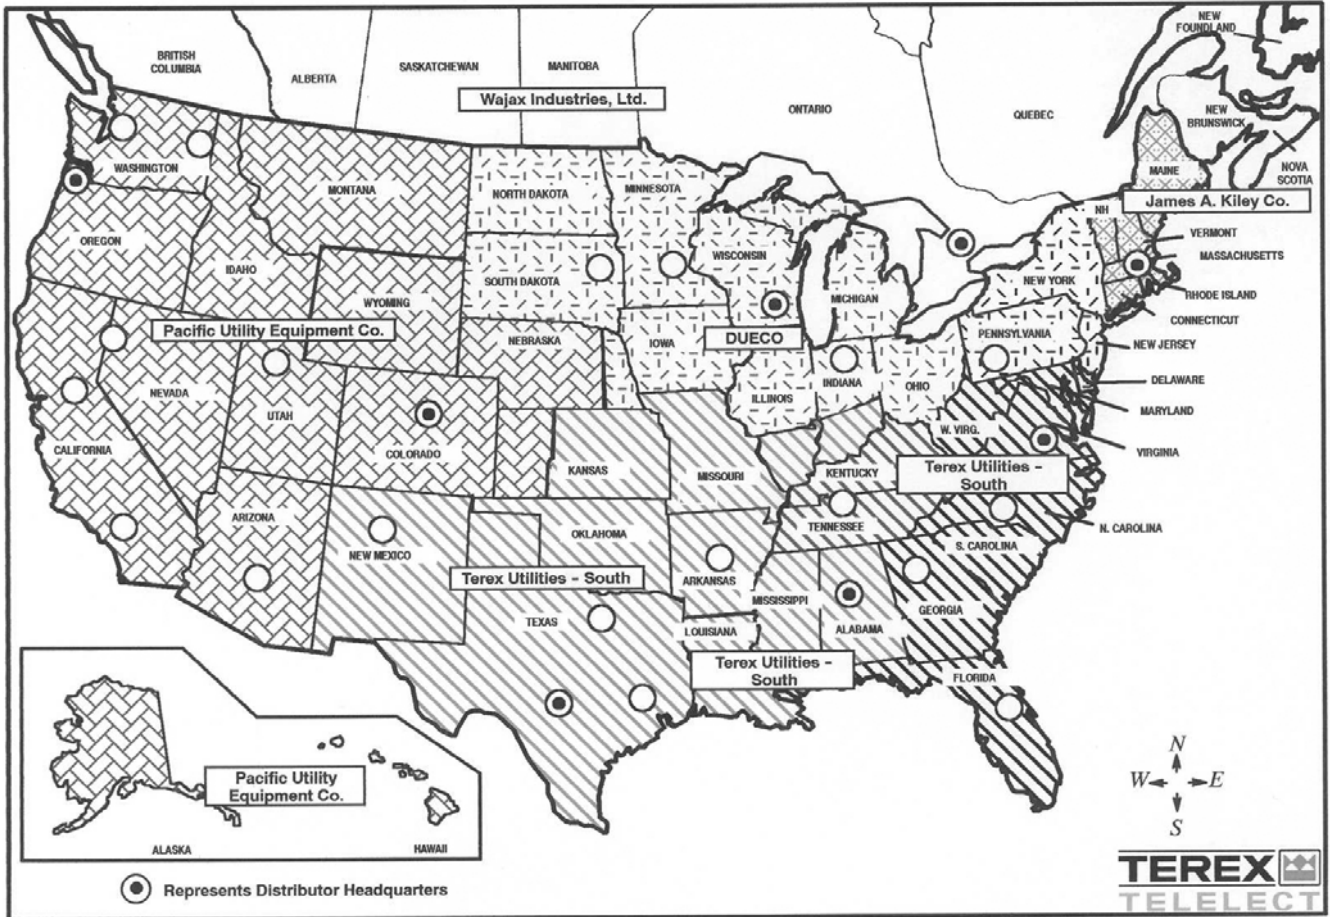

See the Attached list to determine which kit is required, then contact your local Terex Telelect dealer to order. If you can not determine which kit to order, contact your dealer with your model and serial number.

To find the dealer closest to you see the attached map. You can also go to <http://www.telelect.com/> web site.

Should you have any questions or comments concerning this bulletin, please contact the TEREX Telelect Service Department at (605) 882-4000.

No.	Model	Type of platform	Type of tool circuit
Z856	HRM	All side mount	Single or dual
Z856	HR37	Rotating platform with thru shaft hoses	Single or dual
Z856	SC	Rotating platforms	Single or dual
Z856	TLM	Rotating side and end mount platforms	Single or dual
Z857	TC	Side & end mount platforms	Single or dual.
Z858	HR37M	Non-Rotating, Controls on elbow side of platform	Single or dual
Z859	5F, 5H, 6H	End mount non-rotating	All standard locations
Z860	5FC, 5H, 6H	End mount rotating platforms	Single or dual
Z861	XT	Controls on platform	Single or dual
Z862	HR37M	Non-Rotating, with thru shaft hoses.	Single or dual
Z862	XT/SC	Controls between the boom and basket w/o platform rotation	Single or dual
Z863	XT/SC	Back of Cab mount; Controls between the boom and basket with manual dump, w/o platform rotation	Single or dual
Z864	XT/SC	Rear Axle mnt; Controls between the boom and basket with manual dump, w/o platform rotation	Single or dual
Z865	TLP, T292	Tools on boom tip, controls on platform	Single
Z866	T292	Tools on boom tip controls on boom	Single
Z867	TPL	Individual levers on bskt bracket	Single
Z868	TPL	Single stick controls on Platform	Single or dual
Z869	OM	Side mounted Rotating platform	Single or dual
Z870	T Series	Side mount rotating platforms	Single
Z871	TE/TS	Side & End mount platforms	Single or dual
